Ergonomic and innovative design features

SMART

Stairlifts are battery powered to ensure you are in motion even during a power outage. The **continuous charging** feature charges the battery no matter where it is parked.

SAFE

Surrounded by **safety sensors**, Handicare stairlifts are designed to stop if meeting an obstruction – keeping you safe and still on your seat.

INTUITIVE

The toggle control was designed in collaboration with occupational therapists to ensure it is **easy-to-use** and operate – simply push with your hand, arm or wrist in the direction you want to go.

COMPACT

The 950+ boasts a **slim profile** ensuring other stair users can still use the staircase comfortably and safely. Upgrade to a powered footrest to eliminate the need to bend when folding it up.

REVOLUTIONARY

The **Slide Track** moves up the staircase at the same time the seat is moving, leaving the bottom of the stairs completely unobstructed. A manual hinge is also available.

CONVENIENT

For an easier exit, **swivel** your seat toward the landing once you reach the top, either manually or upgrade to our automatic powered option.

Your first step to independence
